G2. Costs of Study

The following tables provide different ways for the agent to show students (a) how Canada compares to other leading study-abroad countries in terms of affordability and (b), in Figure 2, the costs of studying at various levels of schooling in Canada.

Of course, tuition is not the only cost international students will need to budget for when studying in Canada; they must also factor in the cost of living. Figure 1 looks at the average cost of an undergraduate degree, including the cost of living, across leading study-abroad destinations including Canada's Toronto:

In addition to having relatively low tuition fees, international students attending post-secondary institutions in Canada can often offset the costs of studying by working on- or off-campus, or by completing co-op placements during their studies. The agent will be counselling students of different ages pursuing different levels of education; this next table breaks average costs down by level of study in Canada.

The agent will be counselling students of different ages pursuing different levels of education; Figure 2 shows average full-time costs—including tuition and student fees, accommodation and food, personal and health insurance, and books—by level of study in Canada.

The approximate yearly cost of full-time tuition in Canada for international students (CAD):

- K-12 (public): \$9,500 to \$17,000
- K-12 (independent/private): \$45,000 – \$75,000
- Language: \$15,400 (based on 44 weeks per year, \$350/week average)
- College: \$7,000 to \$30,000 depending on the institution and field of study
- University: depending on level and field of study (Statistics Canada)
 - Undergraduate – \$10,703 to \$60,150 (Statistics Canada 2020/21)
 - Graduate – \$3,222 to \$42,710 (Statistics Canada 2020/21)

The cost of studying in Canada will depend heavily on the program, institution, and level of study. Living costs, insurance, and textbooks should be considered as separate expenses, and are rarely included in tuition.
